
Workflow management

A streamlined and effective workflow management solution that reduces the administrative burden on practices and improves patient care delivery.

This service offers much-needed relief to both administrators and clinicians, ensuring that clinical data is accurately recorded, well-managed, and that all necessary actions are promptly addressed to optimise your workflow processes.

Our service includes:

- backlog clearance
- clinic letters
- coding
- discharge summaries, even in cases of delays
- effective filtering of information
- medicine reconciliations
